

HOW TO GET A CNG REFUELLING STATION APPROVED

Nova Scotia

What You Need to Know

So you are interested in switching your fleet to compressed natural gas (CNG)? As you start down this road, you will need to consider the process for approval early on. Whether you decide to work with an experienced engineering firm or you enter into a contract for a turnkey station, there are steps to be aware of in order to get a CNG station approved. At the beginning of the planning process, start by contacting your local natural gas utility to confirm natural gas supply and available pressure.

The CNG Station Approval Checklist on the next page outlines the steps involved in getting a station approved in Nova Scotia. The Reference Table on the last two pages provides extra detail on process, review, inspection, and other requirements.

CNG station installation in Nova Scotia is regulated by the Fuel Safety Section of the Department of Labour and Advanced Education and by local municipalities. The Fuel Safety Section oversees fuel safety, pressure vessels, and Operating Engineers, while municipalities check for compliance with local by-laws. No federal approval is required, unless you want to allow the general public to refuel at your station. If this is the case, Measurement Canada will need to be involved.

The primary code that applies is CSA 108 – Natural Gas Fueling Stations Installation. This Code applies to public and private CNG stations that offer fast fill capabilities, time fill capabilities, or both.

Public stations can refuel to a settled pressure of 3000 psig. Private stations can refuel to a settled pressure of 3600 psig. Work is underway to allow all Canadian stations to refuel to a settled pressure of 3600 psig.

Knowledgeable design firms, installation firms, and equipment suppliers can help with station options, approvals, and permits.

The total timeline to build a new CNG station will vary, but it is recommended that you plan for a minimum six to nine months based on equipment lead time as well as time for review and approval.

CNG STATION APPROVAL CHECKLIST

1. Provide notice and review process.

Gas Utility Level

- Contact your local natural gas utility to confirm natural gas supply and available pressure.

Municipal Level

- Meet with local municipal officials to inform them of the proposed project and to review the approval and permitting process.

Provincial Level

- Contact the Fuel Safety Section of the Department of Labour and Advanced Education to inform them of the proposed project and to review the approval and permitting process.

2. Submit supporting documentation and obtain approvals and permits for construction.

Municipal Level

- Refer to the Reference Table on the following page for a comprehensive list of municipal Authorities Having Jurisdiction (AHJ) that may be involved in approving your project.
- Obtain a letter of compliance from the appropriate municipal authority.
- The topics of interest to the local municipality will include some or all of the following:
 - Legal
 - Land use
 - Site services
 - Environmental
 - Other

Provincial Level

- It is recommended that this step be completed in parallel with Step 1, as the tasks listed are codependent.
- Refer to the Reference Table on the following page for a comprehensive list of provincial AHJs that may be involved in approving your project.
- Submit an application for a Class 4 (Natural Gas Dispensing Station) Gas Business Licence.
 - Submission requirements for this licence can be found in N.S. Reg. 11/2011.

- Submit an application for a Gas Technician Licence. Submission requirements for this licence can be found in N.S. Reg. 11/2011.
- Prepare site plan drawings that identify suppliers, equipment, and details of equipment interconnections. These drawings should include:
 - Site P&ID with all pipe sizes and pressure ratings shown; and
 - Detailed Bills of Materials indicating all component specifications and ratings, provincial CRNs, material specifications and any necessary third-party certification for the equipment (including CNG storage vessels).
- Contact equipment manufacturers (e.g., CNG dryer, CNG compressor package, CNG dispensing equipment, and other pressure retaining equipment) for supporting information, such as:
 - Equipment P&IDs with all pipe sizes and pressure ratings shown; and
 - Detailed Bills of Materials indicating all component specifications and ratings, provincial CRNs, material specifications and any necessary third-party certification for the equipment (including CNG storage vessels).
- As per N.S. Reg. 11/2011, a gas business licensee must apply to an inspector for a permit before installing a natural as vehicle refuelling station. This application must be in a form specified by the Chief Inspector and accompanied by the appropriate fee. It is good practice, however, to include the following information:
 - Site plans indicating setbacks and separations consistent with CSA B108 and any additional provincial regulations;
 - Narrative describing station sizing, equipment, and operating conditions;
 - Site and equipment P&IDs with all pipe sizes and pressure ratings shown;
 - Detailed Bills of Materials indicating all component specifications and ratings, provincial CRNs, material specifications, and any necessary third-party certification for the equipment;
 - Hazardous locations diagrams; and
 - Obtain electrical approval from the appropriate AHJ by submitting the following documentation:
 - Single line electrical schematics
 - Site inspection report

NOTE: The following describes the process required by the Fuel Safety Section of the Department of Labour and Advanced Education. Similar processes may be required by the other AHJs listed in the Reference Table.

Federal Level

- If you will be offering refuelling capabilities to the general public, you will need to have your dispenser certified by Measurement Canada.

3. Construct station and develop a plan for inspections.

- Begin site construction once the station design has been approved.
- Once construction is substantially complete, obtain approval from the necessary AHJs to energize the equipment and introduce gas to the station. This approval will involve verifying that any gas appliance container, or piping that is part of the system conforms to all applicable regulations and Codes. This conformity is indicated via a set of gas tag systems, which have been outlined in N.S. Reg. 11/2011. You may also be asked to provide proof of electrical approval and pressure vessel CRNs at this stage.
- Conduct commissioning and invite the appropriate AHJs to attend.
- Once all equipment has been commissioned and tested, contact the inspector (and any other necessary AHJs identified throughout this process) to schedule a final site inspection and to identify any hold and inspection points. For example, they may require the pressure testing of underground pipe with the trenches open, or that a test prescribed by either the regulations or a Code be witnessed by an inspector.

4. Obtain operating permit and develop a plan for re-certification.

- Upon successful completion of all final inspections, ensure that all approvals, permits, certificates, and registrations (as applicable) are in order and in place. This will include the following, although others may be required depending on station size and location:
 - Class 4 (Dispensing Station) Gas Business Licence (as mentioned in Step 2(b));
 - Gas Technician Licence (as mentioned in Step 2(b), required for anyone installing or servicing the facility); and
 - Gas Permit (required to operate the station).
- Review and understand the requirements for periodic renewals of the above listed document(s).

HOW TO GET A CNG REFUELING STATION APPROVED

CNG STATION APPROVAL REFERENCE TABLE

How to Use this Reference Table

The information given in this Reference Table is intended to provide extra detail to supplement the checklist on the previous page. Each step on the previous page is further broken down into gas utility, municipal, provincial, and federal level tasks. The relevant Authority Having Jurisdiction (AHJ), guiding document, required documentation, nature of approval, and the documents one receives upon obtaining approval is then provided for each task. Additional approvals beyond those outlined below may be required, depending on the circumstances.

Item	Authority	Guiding Document	Documents to Submit	Nature of Approval	Approval Documents	
Step 1: Provide notice and review process.						
Natural Gas Utility						
101	Contact your local natural gas utility to confirm natural gas supply and available pressure.	Local natural gas utility	N/A	Verbal/e-mail request.	N/A	Confirmation of receipt.
Municipal Level						
111	Inform the AHJ of the proposed project and review the approval and permitting process.	Local municipal officials	N/A	Letter	N/A	Confirmation of receipt.
Provincial Level						
121	Inform the AHJ of the proposed project and review the approval and permitting process.	Department of Labour and Advanced Education – Fuel Safety Section	N/A	Letter	N/A	Confirmation of receipt.
Federal Level						
131	N/A					
Step 2: Submit supporting documentation and obtain approvals and permits for construction.						
Municipal Level						
211	Obtain a letter of compliance from the appropriate AHJ for submission to the Department of Labour	Local municipal officials	Documents pertaining to the following topics: legal and land use.	As required by the Department of Labour and Advanced Education – Fuel Safety Section.	By-law review.	Letter signed by the Chief Building Official or designate.

HOW TO GET A CNG REFUELING STATION APPROVED

	Item	Authority	Guiding Document	Documents to Submit	Nature of Approval	Approval Documents
	and Advanced Education – Fuel Safety Section.					
212	Compile legal information, which may include none to all of the following: surveys, easements, and rights of way.	Local municipal officials	Any pertinent legal documents.	As required by the municipality.	By-law review.	Building permits and others, as required by the municipality.
213	Compile land use information, which may include none to all of the following: official plan, zoning by-laws (i.e., rezoning or minor variance applications), site plan control, building permits, and sign permits.	Local municipal officials	Any pertinent land use documents.	As required by the municipality.	By-law review.	Building permits and others, as required by the municipality.
214	Compile site services information, which may include none to all of the following: water, storm water, sanitary sewer, and electrical services.	Local municipal officials	Any pertinent site services documents.	As required by the municipality.	By-law review.	Building permits and others, as required by the municipality.
215	Compile environmental information, which may include none to all of the following: conservation authority, natural environment designation, site assessment (Phase I, Phase II), and agricultural MDS.	Local municipal officials	Any pertinent environmental documents.	As required by the municipality.	By-law review.	Building permits and others, as required by the municipality.
216	Compile any other necessary information, which may include none	Local municipal officials	Any pertinent documents.	As required by the municipality.	By-law review.	Building permits and others, as required by the municipality.

HOW TO GET A CNG REFUELING STATION APPROVED

	Item	Authority	Guiding Document	Documents to Submit	Nature of Approval	Approval Documents
	to all of the following: Ontario Heritage designation, local cultural designation, archaeological site designation, railway rights of way, First Nations consultation, and mining claims.					
Provincial Level						
221	Gas Business Licence	Department of Labour and Advanced Education – Fuel Safety Section	Primary regulatory instruments include: N.S. Reg. 11/2011.	Submission must include the name and mailing address and civic address (if different) of the applicant, a list of the officers of the applicant (if it is a corporate body), a list of certificate holders and gas technicians who are employed with or contracted by the applicant, proof of public liability insurance in an amount deemed appropriate by the Chief Inspector, and the civic address and location where the regulated work is to be performed.	Inspection and/or the production of any records of a gas business licensee that the inspector considers necessary to ensure proper administration of the licence and compliance with the regulation.	Class 4 (Natural Gas Dispensing Station) Licence.
222	Gas Technician Licence	Department of Labour and Advanced	Primary regulatory instruments include: N.S. Reg. 11/2011.	Proof of the applicant’s identity, the class of licence	Document review by the Department of Labour and	Licence.

	Item	Authority	Guiding Document	Documents to Submit	Nature of Approval	Approval Documents
		Education – Fuel Safety Section		sought, proof that the applicant meets the qualifications laid out in N.S. Reg. 11/2011, and any relevant information about the applicant’s training and experience.	Advanced Education – Fuel Safety Section.	
223	Prepare site plan drawings that identify suppliers, equipment, and details of equipment interconnections.	Department of Labour and Advanced Education – Fuel Safety Section	Primary regulatory instruments include: . Applicable codes include: CSA B108, CSA B51, and CSA B149.	P&IDs and detailed Bills of Materials for the overall site that have been stamped by a P. Eng. (including CRNs as applicable, ratings, and material specifications), site plan drawings indicating setbacks, a narrative describing station sizing, equipment selection, and operating conditions, and hazardous locations diagrams.	Document review by the Department of Labour and Advanced Education – Fuel Safety Section.	Letter of design approval.
224	Acquire detailed drawings for major pieces of equipment from manufacturers.	Department of Labour and Advanced Education – Fuel Safety Section	Primary regulatory instruments include: N.S. Reg. 11/2011. Applicable codes include: CSA B108, CSA B51, and CSA B149.	P&IDs and detailed Bills of Materials for each major piece of equipment (including CRNs as applicable, ratings, and material specifications for individual components). These must be submitted as part of the overall site	Part of item 223 above.	Part of item 223 above.

	Item	Authority	Guiding Document	Documents to Submit	Nature of Approval	Approval Documents
				approval, per the above.		
225	Determine Operating Engineer requirements, if any.	{Insert AHJ}	{Insert CSR}	{Insert list of documents}	N/A	N/A
226	As per the requirements laid out by the Department of Labour and Advanced Education – Fuel Safety Section, obtain electrical approval of the proposed design.	Nova Scotia Power – Inspection Services	Applicable codes include: Canadian Electrical Code (CSA C22.1).	Single line schematics and a site inspection report.	Document review.	Letter of compliance.
Federal Level						
231	Dispenser must be certified if fuel retailing will be offered.	Measurement Canada	C.R.C., c.1605.	None at this time. However, a dispenser capable of meeting Measurement Canada requirements must be specified.	N/A	N/A
Step 3: Construct station and develop plan for inspections.						
Municipal Level						
311	Arrange for any interim and final building and site inspections that might be required.	Local municipal officials/utilities	As required by the municipality.	As required by the municipality.	Field inspection.	Interim and final inspection reports/ approvals.
Provincial Level						
321	Conduct interim inspections and obtain approval to energize equipment and to introduce gas to the system.	Department of Labour and Advanced Education – Fuel Safety Section	Approval letter obtained in Step 2.	Field test report(s).	Field inspection.	Verbal approval.
322	Obtain electrical approval of the facility.	Nova Scotia Power – Inspection Services	Applicable codes include: Canadian	N/A	Field inspection.	Certification sticker/ letter.

Item		Authority	Guiding Document	Documents to Submit	Nature of Approval	Approval Documents
			Electrical Code (CSA C22.1).			
323	Conduct final inspection (completed by Fuel Safety division).	Department of Labour and Advanced Education – Fuel Safety Section	Primary regulatory instruments include: N.S. Reg. 11/2011. Applicable codes include: CSA B108, CSA B51, and CSA B149.	N/A	Field inspection.	Letter of approval
324	Conduct final inspection (completed by Operating Engineers division).	{Insert AHJ}	{Insert CSR}	Application form.	Field inspection.	Plant registration.
Federal Level						
331	Have dispenser certified if fuel retailing will be offered.	Measurement Canada	C.R.C., c.1605.	Verbal/e-mail request.	Field inspection.	Certification sticker applied to dispenser.
Step 4: Obtain and maintain operating permits and licences.						
Municipal Level						
411	Final approval if building permit was required.	Local municipal officials	Building permit.	As required by building permit.	Field inspection.	Occupancy permit.
Provincial Level						
421	Station Operating Engineer Licensing.	{Insert AHJ}	{Insert CSR}	{Insert list of documents}	N/A	{Insert certificate type}
422	Obtain a Licence to Operate the facility.	Department of Labour and Advanced Education – Fuel Safety Section	Primary regulatory instruments include: N.S. Reg. 11/2011. Applicable codes include: CSA B108, CSA B51, and CSA B149.	{Insert list of documents}	Review by Department of Labour and Advanced Education – Fuel Safety Section.	Gas permit.
Federal Level						
431	N/A					

NOTES:

1. Depending on the type of business, additional licences may be required.

HOW TO GET A CNG REFUELING STATION APPROVED

2. Additional approvals and assessments may also be required. For example, these might include a Noise Screening Assessment and/or a Pre-Start Health and Safety Review (PSR). It is recommended that you identify these additional requirements during your initial conversation with the Fuel Safety Section of the Department of Labour and Advanced Education, and your local municipal officials.
